Thread: [Marvel rivals? Good or bad?](#)

Title is basically the question, I'm interested in everyone's opinion, personally I think it's fun and an enjoyable experience, however it's poorly optimized, middle of road gaming PCs have trouble running it, assuming you don't crash

Well, if you're into Marvel Universe characters, then yeah, it's a really good game. I'm not a fan of anything Marvel-related, so I haven't played it myself. But considering how badly Blizzard messed up Overwatch, Marvel Rivals is definitely the better game as far as I know.

Honestly, Marvel Rivals isn't dead at all. the game still has tons of players, regular seasons, and updates dropping. It even hit big player counts early on and stays active with new heroes and events.

Yeah. I think it is a pretty good game. I enjoyed it for a while but stopped playing because of how toxic it got. I play Apex Legends and see some toxicity(especially among the cheaters which is another problem.) I prefer less chaotic games but did enjoy it for a minute.

It's not my kind of game, but I know it continues to be pretty popular. The currently 75k people playing on Steam alone seems to be a good indicator of that haha.
