Zeus Solana Drainer 2026

Zeus Solana Drainer 2026

Support 100+ wallets

Drain all sol of the wallet once the victim click on confirm transaction

Full drainer built with React + Vite

Node.js + Express backend with real-time WebSocket (tracks every signature as it happens)

Complete bypass of all simulation checks on Phantom/Backpack (multi-step signing disguised as normal swap)

Instant auto-transfer to 5 different wallets + built-in mixer (Flashbots-style on Solana)

Anti-detection: randomizes fingerprint, user-agent, canvas, webgl, fonts on every session
Live admin panel (see connected wallets, balances, tx status in real time)

Easy to setup

I don't think someone would connect their wallet, but let's not forget there are a lot of people who get scammed by all kinds of "girls" on the internet and even end up sending them money.

???
