Thread: [Im looking very good Exploit PDF file, im using Viola RAT](#)

Dailulan12 - December 5, 2025, 1:13 pm

Guys i want to exploit and crypte my exe file for i can send it via gmial , please dm me who can do it \$

DeathPenalty666 - December 5, 2025, 2:40 pm

pdf explit dont crypt file. And pdf exploit work usually on a SPECIFIC READER and can be on a specific version, like adobe prf, FOXit pdf reader etc.

BrandPulseDigital - December 5, 2025, 3:20 pm

Please be careful, sir. From what I've learned recently, there are no functional PDF exploits available, and genuine zero-day exploits are extremely rare and very expensive.

Do you have them without no extension spoofing ? And not the LNK with PDF shortcut icon?

I'm not looking for anything free. I was only pointing out that PDF exploits these days are mostly scams. So, I simply wished you good luck selling it to others, but I still wouldn't place any bet on it

with you. I hope that's clear enough.

KyleTheXyle - December 6, 2025, 3:52 pm

Contact me on telegram - @ptxgun

I can give you a crypt and pdf xploit

Binance - December 9, 2025, 8:49 am

First, violetRAT is made by a total faggot so I would consider using something else.

Second, you will not find a .pdf exploit that opens in a browser that isn't a trampoline (a direct download link as a hyperlink to something else) for anything under a 0day price.

This is not 2012. You can find it for Adobe Reader/FoxIT Reader etc but rarely do people use this software anymore.
