Thread: [Amazon SES 50K Pre-Approved Accounts | Production Ready | \\$400](#)

Pebble - December 6, 2025, 12:50 am

? PREMIUM AMAZON SES 50K ACCOUNTS ?

Instantly Verified & Ready to Send | Ireland & N. Virginia

\$400

per account

? Crypto Payment Accepted (USDT-TRC20 Preferred)

? HackForums Exclusive

All transactions MUST be completed through HackForums Middleman/Contract system

This protects both buyer and seller

? I will NOT accept direct payments outside of HF contracts

? What's Included

- Pre-approved Amazon SES account
- 50,000 emails per day sending limit
- 14 emails per second max rate
- Production access granted status
- Clean account history
- Fresh login credentials
- Priority regions available (Ireland & N. Virginia)

? Key Features

- Fully activated & ready to use
- No warm-up required (recommended though)
- Ireland & N. Virginia priority regions
- Instant credential replacement if needed
- All credentials changeable (password, email, MFA)

? Delivery & Support

- Usually delivered within minutes
- Max 2-3 hours in rare cases
- Direct message support on HF

- Sending re-enable service available: \$150
- Replacement guarantee

? How It Works

Step 1: Send DM

Direct message me on HackForums to inquire

Step 2: Setup Contract

We'll create an official HF contract for \$400

Step 3: Pay via HF

Complete payment through HackForums system

Step 4: Receive

Get your credentials after contract payment

? Important Requirements

? Login within 12 hours of receiving credentials

? You must verify your own sending domain

? Domain configuration not included in price

? Handle any AWS re-verification requests yourself

? Use region-appropriate IP addresses

? Money-Back Guarantee

? Full Refund If:

- Credentials not delivered after confirmed payment
- Login credentials don't work on first attempt

? Sending Re-Enable:

- If AWS puts your sending on hold, we can restore it for \$150

? No Refund For:

- User mismanagement or AWS policy violations

? Best Practices

? Use residential/quality VPN matching account region

? Gradually warm up before hitting full volume

? Keep moderate usage first 30-45 days

? Follow AWS Terms of Service strictly

? Monitor bounce and complaint rates

? Avoid These Mistakes

- ? Don't login from mismatched IP addresses
- ? Don't link multiple AWS accounts together
- ? Don't request early limit increases
- ? Don't violate AWS Terms of Service
- ? Don't send without proper warmup

? Frequently Asked Questions

Which regions are available?

Ireland and N. Virginia are prioritized. Other regions may be available depending on current stock.

Can I send from different regions?

No. SES accounts are region-locked. Sending is restricted to the configured region only.

Can I change the login credentials?

Yes. You can update the password, email, and MFA settings to your preference.

Are other AWS services available?

These accounts are optimized for SES. Other services like EC2 may have limitations depending on the batch.

How reliable are these accounts?

Very reliable when used correctly. Follow proper warmup procedures and use region-appropriate IPs for best results.

What if my sending gets suspended?

If AWS places your account on sending hold (not a full suspension), we offer a re-enable service for \$150 to restore your sending capabilities.

Why only HackForums contracts?

HF contracts protect both parties. The middleman system ensures fair dealing and provides dispute resolution if needed.

Ready to Scale Your Email Operation?

? Send me a Direct Message on HackForums

? All deals MUST go through HackForums contract system. I do not accept direct payments.

Peble - December 7, 2025, 7:59 pm

I have 2 Ireland and 1 North Virginia accounts available today, looking to form connections with new frequent customers. I can supply accounts reliably on a daily basis for any email marketing operations.

Peble - December 16, 2025, 12:10 am

Many Virginia and Ireland accounts in stock, I'm offering discounts for frequent bulk buyers, feel free to get in touch to discuss.

Jwett - December 18, 2025, 9:12 am

This sounds interesting, Replying to keep it saved! Could I send you a PM to discuss?

Feel free to.

Multiple N Virginia and Ireland accounts in stock currently.

AB33770 - December 21, 2025, 7:15 pm

How do you expect us to buy from you, you already have 3 open disputes?

Hazii - December 21, 2025, 11:22 pm

I could buy couple of discounted this week if you accept middleman. Sorry to say but three open disputes where you defendant do not give very much confidence. To interested buyers, SES accounts can be recovered so yes, think calmly.

Peble - December 21, 2025, 11:24 pm

Virginia accounts are in stock, I'll deal with most MMs on HF. You can easily secure the account by changing the email and phone number.

mustafashaikh2024 - December 23, 2025, 3:47 am

? Scammer Alert – Seller Recovered 7 Accounts After 15 Days & Deleted Chats

I bought 7 accounts from this seller. Everything worked initially, but after ~15 days he recovered all accounts and changed the details, locking me out.

All communication was done via Telegram, and he deleted the entire chat history after recovering the accounts. This clearly shows intentional fraud and retained recovery access.

Trade with caution. I can provide payment proof and a timeline if required.

Hazii - December 30, 2025, 1:37 am

That is this user's (OP) business model, yet people falling for a "cheap and premium" trap. Sorry for loss. Same happened in other forum, i am 99% sure this is the same guy.

Hey this is an older message, could you update if you still have stock?

Ryan Carter - September 3, 2026, 6:52 am

Hey! I can provide Amazon SES accounts with Production Access and a 50K daily sending limit. Would you be interested in those?
