Definitely a shorter guide, and the beginning seems like something you might think is commonly found online, but as you read further you'll see topics that are never covered elsewhere and is only available to you thanks to his experience with Steam as a whole. He shows you how to never get banned doing these discounts, and how to revert account limits if ever needed.

The cs2 arbitrage meta is another gem that I'm not sure many people would even think to know about even if they were in the space. You can easily make the money that's stated in the guide that anyone can do. Just requires a bit of time and slight effort but it's easy enough for beginners to understand. This guide is well worth the money if you're looking to expand your value of the whole Steam ecosystem.

Just bagged another trio of games for less than 2\$. Don't miss out!

Hey Basilisk, curious to understand more, what is the exact way of "making money off Steam", in 2 parts such as first being getting the games free/hugely discounted and then reselling accounts, as I assume there is no other way of getting the moeny out of it, no? Let us know in a big more details if you can, thanks.

The guide relies on how to flip existing skins for profit, and how to use this profit to buy games in the cheapest way possible.

I've already made sales, bit im willing to give you a discount copy for that.

JoseMar - January 19, 2026, 4:11 am

Honestly, I think it's better to accept some Voucher/Copy offers from members with a good history, or even better, to reach out to someone yourself. At least until people start to trust your method. This is just advice, what you do with it is up to you. ?

Laughing Man - January 19, 2026, 9:05 pm

I'm curious how this is different than, region changing an account to purchase with conversion discounts.

Country of Origin for the cheapest games used to be, Turkey. Now it's Ukraine and Khaz. What different from just changing region? I understand making money, obviously if you buy keys & skins at discounted rates in an alternate currency, you can trade them to local "US account" and sell them.. However this concept is well documented. If this is not the method being used, I would love to take a look at it via one of the vouch copies.

I believe I meet the expectations for a trusted & well recognized member, If not I wish you the best of luck with your sales.

This guide isn't another pdf you can find on google.

It's a well-documented guide with actual money-making ways, not just buying games for cheap.

The guide is extensive and covers every aspect of the matter, including not getting flagged or banned.

However, since you do seem like a reputable member I'm willing to give you a vouch copy.

Fresco - March 28, 2026, 1:08 pm

Hi.

Is there any additional investment beyond the method itself? Like proxies, VPN, etc

How many times can this be done? Because the main post shows \$187 in savings over almost a 1-year timespan, which is not enough to consider this method as an extra cash flow if you are doing less than \$20 monthly. Maybe im missing something?

Thanks

Yes, you will need to buy a vpn for a few pennies.

Also, this is just a glimpse.

It works with all games, but some games aren't available in some regions due to local restrictions.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.
