Doesn't have to be anything special, I just need a way to talk to people anonymously.

I tried to make an account, got a burner, did the whole rigamaroll, prepaid card etc... seems like there's catches at every step to block anyone who doesn't wanna KYC.

Got to the final step, TG wants a credit card to send me a validation text. I gave my prepaid and it isn't accepted. so i give up.

Send offers on accounts or help setting up.

[contract=tid]Start Contract[/contract]
