Building a Petabyte-Scale Web Archive

Discover how Bright Data optimize its Web Archive to handle petabytes of data in AWS. Learn how a \$100,000 billing mistake revealed the trade-off between write speed, read speed, and cloud costs—and how we fixed it with a cost-effective Rearrange Pipeline. Spoiler: We are hiring!

Stanley, you're hiring?! I want to apply, I promise not to shit talk you openly.

Damn, Petabyte, I think my Blob is around 14.7TB and I am at well over 11 Million Images now. That's certainly a crazy cat amount.
