? NAMZ CRYPTER ?
The Most Advanced FUD Crypter of 2025
Bypass Every AV & EDR | APT-Level Evasion | Polymorphic Engine

1. INTRODUCTION

Welcome to Namz Crypter - a next-generation crypter built from scratch with cutting-edge evasion techniques used by APT groups. Unlike traditional crypters, Namz uses a polymorphic engine generating unique code per build. Combined with anti-analysis and EDR bypass, your payloads stay FUD for 1-4+ weeks.

- Quote:Quick Facts:
- Web-based platform - no software required
 - Supports .NET Framework, .NET Core, and Native C/C++
 - Real-time AV/EDR bypass updates
 - 24/7 automated builds with REST API

2. WHY NAMZ CRYPTER?

- ? Other Crypters:
- Same stub for everyone
 - Detected in 2-3 days
 - Basic obfuscation only
 - No EDR bypass
- ? Namz Crypter:
- Unique polymorphic code per build
 - FUD for 2-4+ weeks
 - AMSI bypass, ETW patch, UAC bypass
 - Bypasses CrowdStrike, SentinelOne, etc.
 - 100% web-based with REST API

He works with NamzCrypter and is a promoter. I was given a test copy by Namz (two "crypted" files), both of which were dysfunctional and detected immediately. Namz still hasn't opened my message on Telegram about why it didn't work, even though I was initially interested in purchasing. This DeathPentalty666 guy is the only person in this thread claiming to have tested it with multiple RATs and had success. After I messaged him privately asking for proof or a demonstration of its success, he ultimately couldn't provide it. So, anyone interested in this "crypter," take my comment as you will before you consider purchasing.

samanthadeltadore - January 12, 2026, 6:24 pm

Do you have the async ?

can you share with me?? How do i buy the modified version on here in HF

Chaoslive - January 13, 2026, 12:17 am

I have made a purchase on your website, but I'm unsure what the issue is—it still doesn't work. Could it be that the amount I transferred was incorrect?

redem1999 - January 13, 2026, 3:37 pm

I made the payment on your website using monero , but the service has not been activated. Its been more than 24 hours

jugginofmyipod - January 14, 2026, 1:35 pm

yep don't pay for this lol, you make the payment and it says "awaiting confirmation" constantly even after on the blockchain it tells you that the payment has been confirmed.

no clue why staff hasn't deleted this yet its a complete scam

Is the crypter still live? I texted to developer but no answer received

malleyr62 - January 21, 2026, 1:56 pm

i will like to crypt and check your work and how can we open escrow

Gudyear - January 23, 2026, 1:17 am

Can try before purchasing?

mommyreal - January 23, 2026, 1:53 am

This is a fake. I paid for the crypter and I did not receive any message from them. They did not even confirm my payment using their website. The website is fake and they are not delivering any crypter. There is no telegram support. what they set up is a telegram channel with only 19 subscribers and no activity. Do not let them trick you.

First sometimes when you pay with other crypto than BTC or ETH i need to activate them manually the second things i never recieve a dm from you or something for activate your license.
