Thread: [High salary hiring lateral movement/privilege escalation penetration testers.](#)

ak11901 - December 10, 2025, 5:56 am

No beginners please.

Rest assured: We do not target legitimate/regular companies for penetration testing.

Job Task: Conduct lateral movement penetration testing on the target local area network (LAN).
(We will provide you with access permissions to one computer within the LAN.)

If you have zero-day vulnerabilities at your disposal, that would be ideal.

Generous compensation — we will meet all your requirements.

If you're interested, please send me a private message.

in which language you need privilege escalation (AKA UAC Bypass).

The primary focus is lateral movement penetration.
