Thread: [Evelyn Panel - Stealer C2 \[ High Knockrate 98% \] \[ 88 KB \] \[ STABLE \] All Browsers](#)

**Polaris Web** - December 10, 2025, 4:04 pm

? Thread Content

Hey everyone! ?

I've been working on this project for a while and finally decided to share it with the community. This is Evelyn - a complete stealer project written in pure C. It's lightweight, fast, and gets the job done! if you are tired from AI slop contents or non stable products, this is for you. ?

This is Evelyn V4 Panel Source

[Video: <https://www.youtube.com/watch?v=HFuwDbOnl8Q>]

NOTE : This Project Receives Updates And Changes Alot.

Evelyn V8 Panel Access

? What This Does

Basically, this tool extracts data from browsers and other applications on Windows systems. Here's what it can grab:

Browser Stuff:> Passwords (decrypted from Chrome/Edge/Brave)

- > Cookies (full export)
- > Payment methods & credit cards
- > Browser history
- > Bookmarks

Crypto Wallets:> MetaMask (all profiles)

- > Phantom
- > Trust Wallet
- > Coinbase Wallet
- > Binance Wallet
- > Exodus Desktop
- > Atomic Wallet
- > And like 20+ more wallets!

Other Goodies:> Telegram sessions

- > Discord tokens
- > Steam/Epic Games/Uplay credentials

- > WiFi passwords
- > FileZilla FTP credentials
- > VPN configs (OpenVPN, [censored], ProtonVPN)
- > Clipboard data
- > Screenshots (PNG format)
- > System info & installed programs

Technical:> Pure C code (no dependencies except GDI+)

- > Memory-based file copying (handles locked files)
- > Multi-profile support (all browser profiles)
- > Automatic retry mechanisms
- > Error handling & fallbacks

Web Panel:> Real-time dashboard

- > IP whitelisting
- > Crypto websites viewer
- > PayPal credentials page
- > Cookie converter (JSON to Netscape)
- > Secure authentication
- > Modern UI with dark theme

Web Panel Protection:> IP whitelisting (only your IPs can access)

- > Bcrypt password hashing
- > Session fingerprinting
- > CSRF protection
- > Rate limiting & brute force protection
- > Secure file handling

Crypto Websites Page:> Shows credentials from crypto-related sites

- > Filters by comprehensive domain list
- > Copy-to-clipboard buttons
- > Download links

PayPal Page:> Dedicated PayPal credentials viewer

- > Direct login link generation
- > Secure display

Cookie Converter:> Converts JSON cookies to Netscape format

- > Supports Chrome/Edge/Brave formats
- > Handles various timestamp formats
- > Batch conversion

VM Detection:> Computer name patterns

- > Disk size checks
- > VM process detection
- > Registry checks
- > RDP session detection
- > Hyper-V detection

Debugger Detection:> IsDebuggerPresent checks

- > NtQueryInformationProcess
- > CheckRemoteDebuggerPresent
- > Timing-based detection

Network Security:> (all traffic encrypted)

- > Credentials not visible in binary
- > Memory wiping prevents dumps

> Performance

> Optimized for speed (reduced sleep delays)

- > Memory-based file operations
- > Chunked file handling
- > Parallel processing where possible
- > Smart retry mechanisms

> Designed For Team Use

> Admin Create Username/Password

- > Admin Can Delete User Accounts.
- > All Users Have Separated Panel/Logs
- > Fast/Secure Login.
- > IP WhiteList

> Evelyn Panel New Update

C2 System:> Switched To C2

- > Persistent C2 Loop
- > Silent Command Execution
- > Discord Token Extraction
- > More Browser Extraction Support

Business Domains Feature:> Scanning: Identifies credentials related to enterprise services

- > Microsoft 365, Office 365, Azure
- > Google Workspace, G Suite
- > Salesforce, ServiceNow
- > VPN services (Cisco AnyConnect, Fortinet, etc.)
- > Business email services
- > Corporate SSO portals

Email List Feature:> Extraction: Collects all email addresses from browser password database (username/login fields)

- > Extraction: Collects all email addresses from autofill data (email fields)
- > Web Panel: New email\_list page with email list and source breakdown
- > Search and filter capabilities
- > Export to text file
- > Unique email count statistics

> Output Structure

will be waiting!

**DewGho** - December 11, 2025, 5:02 am

I don't understand:

"PayPal credentials page" — did you just create a separate page where only PayPal data will be displayed? Is that the login and password?

"PayPal page:  
Special PayPal credentials viewer  
Generate a direct link for login  
Secure display"

Does your software launch the PayPal page directly from the infected computer via Hvnc?

**Polaris Web** - December 11, 2025, 10:34 am

Wanted nothing to do with Evelyn Panel, paid \$150 upfront for custom loader, completely seperate of this product, you have no idea what to do, took the money, begged for more, never received a single piece of code, no files sent over just excuses and drug induced rage LOL, just decided to block you to save sanity. People see through your lies, I wipe my ass with \$150, and its 25% of your monthly gypsy Bulgarian wage, so of course you are going to scam. Keep it and feed the kids, Im glad I can help in some way. I just hope others here don't purchase any of these products, I promise you will be scammed. Hes a new account, 2 completed contracts from purchases, nothings he's sold has had a valid contract without a dispute. Take care. Glad I could help my part in helping others not get scammed. Maybe you will get a job.

we can say that yeah, but most of the times. no need for bruteforce, most of the peoples using same password on their wallet login

so you can bruteforce or you can manually put the password.

**CoCoCHanel** - January 18, 2026, 7:40 am

Lol? source code for 350\$? What about detect in AV/? Have toy a fresh scans?

**Polaris Web** - January 18, 2026, 3:32 pm

(Jan 18, 2026 08:40 AM)CoCoCHanel Wrote: [\[CITE\]](#) Lol? source code for 350\$? What about detect in AV/? Have toy a fresh scans?

yes. 350\$ you see it right, stub is written in C from scratch. detect in av is very low. but you must still use crypter.

**Crypt4You** - January 20, 2026, 1:33 am

????? Excellent Stealer Source - Worth Every Penny

Just finished integrating this stealer source code into my operations and I'm impressed.

What's Included:

Browser password extraction (Chrome, Edge, Firefox, Brave, Opera)

Cookie/session stealing with full browser support  
Crypto wallet grabbers (multiple wallets supported)  
WiFi password dumper  
Discord/Telegram token extraction  
System info collection  
Screenshot capability  
Clean C/C++ source code

#### Code Quality:

The source is professional and well-organized. Compiles without issues on Visual Studio. The seller clearly knows what they're doing - proper memory handling, no crashes, efficient algorithms. I added SOCKS5 proxy module and memory execution myself with no problems .

#### FUD & Detection:

Works great with crypters. The base code has good OPSEC - no hardcoded strings, encrypted C2 communication, anti-analysis checks. Pair it with a good crypter and you're golden.

#### Logs & Exfil:

Log format is clean and easy to parse. Data exfiltration is reliable - supports multiple C2 methods. The panel integration works smoothly for receiving and viewing logs.

#### Support:

Seller was professional and responsive. Delivered source immediately after payment. Answered my technical questions during integration.

#### Minor Notes:

Some features need manual configuration (expected for source code)  
You'll want to customize it for your specific needs  
Works best when you add your own obfuscation/memory execution

#### Bottom Line:

This is proper source code, not some paste. Clean foundation that's easy to extend and customize. Perfect for building your own stealer with your preferred features. Seller is trustworthy and delivers quality work.

Rating: 5/5 ? - Highly Recommended

**Polaris Web** - January 20, 2026, 1:38 am

Checking to come back later...

**catspace** - January 30, 2026, 3:18 pm

Overall an awesome stealer and you can't complain about the price. The purchase was processed quickly and there were absolutely no problems. Setup was easy and the seller immediately offered support for the setup. Very friendly guy. I read a few things about "you should not be doing business with him", but I can say that's complete bullshit. 10/10 product, would recommend!

**casperr** - January 31, 2026, 12:44 pm

Big vouch for my guy. Keep up the great work. Very skilled coder who actually understands what he's doing. I've been using this myself and it's amazing, there's honestly nothing else like it on the market.

**bambobimpe1** - February 1, 2026, 3:19 pm

Nice interface, can i get a vouch copy and also which crypter is best to crypt with.

**FreekonJabs** - February 4, 2026, 6:24 am

Are there any country restrictions?

Is it still undetected by WD?

Is it possible to get test?

**Polaris Web** - February 4, 2026, 6:55 am

(Feb 4, 2026 07:24 AM)FreekonJabs Wrote: [\[CITE\]](#) Are there any country restrictions?

(Feb 13, 2026 08:59 AM)azlaf Wrote: [\[CITE\]](#) I asked this stupid user a few questions, and they started insulting me.

all your questions are answered on this thread, you are asking AI generated questions, you should stop using AI and ask me real questions, you left your brain behind go check it out before you answer this question, i am god damn pretty sure you copied whole thread to "chatgpt" and asked for side effects ???

**Sticky Bot** - February 14, 2026, 8:00 am

Hi, I'm Sticky Bot. The owner of this thread has purchased a Paid Sticky. Hack Forums does not

get involved in deals or deal disputes. We do not vouch for the product or the service offered by members. Please note that all deals are at your own risk. The sticky will expire on Feb 21, 2026. If you or a loved one are interested in buying a sticky please visit this page: [Buy Sticky](#). For more information about Paid Stickies you can read our [Help Doc](#).

**NotYourFriend** - February 14, 2026, 7:28 pm

What does this product help cybercriminals do and what's your Telegram? #SayNoToCybercrime #ActReportProtect

I asked for a 1-day demo access before purchasing, but they refused.

He wants me to buy something without even testing it first. Now there's no way I'm buying it think about it, guys.

**Polaris Web** - February 20, 2026, 5:57 pm

**zereoo** - February 25, 2026, 9:30 am

one of the nicest developers i've met with extremely great 1 on 1 support and his products are way better than expected everything runs as said if not better 10/10 vouch

**MikeJohnLong** - February 26, 2026, 10:54 am

I paid this user over \$2k for projects (i went first), etc. He was very quick to help me setup. He sent me back here on HF to open contract so I can leave a review. He did not scam me when he could have, I don't know why people are calling him a scammer when he's clearly legit.

**Lastrevived** - February 26, 2026, 2:32 pm

Wonderful product! very responsive seller, helped and explained everything. Great job!

**akusayan** - March 3, 2026, 8:55 am

Is your stealer Silent?

Mean it force close Chrome If Chrome is active?

**Polaris Web** - March 3, 2026, 10:13 am

checking

**MikeJohnLong** - March 10, 2026, 3:15 pm

Be extremely careful with this user, I did some deals with him, he will send you fake projects. I gave him \$800 for the source code of his rat named Prismora. He agreed I would receive HVNC & Wallet injections. After I paid him the \$800 he was taking too long to send it so I was getting worried and told him I would donate him extra after he gave me it (never specified an amount). Days later of sending me fake projects he tells me I need to pay him \$150 NOW because he needs it. I kept asking him what he needs it for? He just kept insulting me telling me I will be blocked unless I pay it, and he raised it to \$250 because I asked what he needed it for (keep in mind I offered to give him extra \$ once he sent me the real project out of my generosity and he somehow warped it into me having to pay \$250). I have proofs of everything if anyone wants to see them I can show the screenshot. Although he probably wont be banned here since I didn't do a contract for this deal, im just warning others to be careful since he will 100% scam to buy drugs when he gets the chance.

**freenet7** - March 11, 2026, 8:07 am

Bought source. It looks very good. Creating such a product requires a lot of time and knowledge. He helped me modify the code to work smoothly with latest browsers and also solved other issues.  
Thank you

**farmer321** - March 13, 2026, 4:03 pm

For now the experience has been wonderful, got a free trial and help etc... good ?

**allahinadami2** - March 15, 2026, 6:49 am

The greatest stealer of all time. The seller is so kind. 10/10 vouch

**nightghost** - March 17, 2026, 2:35 pm

Very good and helpful guy. I bought the source code, and the seller helped me with some tasks.

**Stanley** - March 22, 2026, 7:36 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,  
Stanley

**cYBEROPTICS** - March 23, 2026, 11:55 am

**loadman** - April 6, 2026, 10:31 am

one my client uses ur product,, and my question remains when will you push an update to run it completely on memory rather than dropping .dll to disk

**Polaris Web** - April 6, 2026, 2:48 pm

(Apr 6, 2026 10:31 AM)loadman Wrote: [\[CITE\]](#) one my client uses ur product,, and my question remains when will you push an update to run it completely on memory rather than dropping .dll to disk

you can easily fix it by encrypting the .dll using AES and integrate it into the main.c and load in memory. that's why we sell source

**doms5** - April 8, 2026, 4:28 am

Very good Soft, he knows what he do. Don't go around. Just buy from him if you wanna GAME like a PRO.

**nightghost** - April 11, 2026, 7:15 am

I've been working with this seller for about a month, and my impression is that he has psychological issues and most likely isn't the actual coder—someone else is doing the work for him. It's possible

that for some things he manages on his own with the help of AI.

First, I paid him \$350 for a v4 source code. Then I asked him to add Firefox and some other features, and he charged me another \$350. Based on the file metadata, he had already made it for someone else and simply resold it to me. Anyway, he constantly brags that he's the one who "taught" everyone how things are done and offered me the "best" crypter for another \$200.

I sent him another \$200, and after a day of waiting he sent me some kind of builder for Lightshot + sideload DLL. Note that it wasn't made for me—he had already used it himself, and once it got detected, he just sold it to me for \$200.

When you agree on something with him, he won't leave you alone—he keeps sending stickers every 5–10 minutes until you send the money. After that, he disappears with the excuse that he's "working" and you have to accommodate him. After 1–2 days, he sends you something that has nothing to do with what you agreed on.

My last request to him was for an LNK exploit builder that was supposed to convert the EXE into binary shellcode and create a powershell loader to execute it. I sent him another \$200, and he started the same tricks again. After 2 days of waiting, he told me, "I have something better for you — sideload DLL." I assume he wanted to send me the same Lightshot again, since he doesn't even remember what he's sent before.

When I told him that this wasn't what we agreed on, he replied that he was going to go watch a "movie." I told him to screw off—I don't care about the money.

Most people check posts carefully before buying something from a seller, which is good, because HF has become full of kids using AI, and their service is bad simply because they don't know what they're doing or they're trying to scam you in some way.

I'm appealing to those people: DO NOT TRUST this seller. All the positive posts (including mine) come after the first purchase—at that point he behaves normally.

And specifically to you, Polaris: all the money I've given you is something I sometimes spend on dinner and doesn't bother me at all. But in my opinion, in the next 5 years you'll be a bum digging through trash cans.

Do you expect anybody to add a major software feature to any software for \$200? You are delusional or what?

Maybe go ask Somalian kids to write malware for you?

(Apr 12, 2026 08:58 AM)aofk84 Wrote: [\[CITE\]](#) I wonder what kind of drugs this guy is using. He's writing really weird things. The other day he sent a picture of his butt, then deleted the message. When I asked him what he did, he said he didn't do it.

Was it a nice butt at least?

Hello what ABE Bypass is used + are there any geo blocks. Thanks.
