Thread: [S1Clip.app Automate Twitch Clips into YouTube Shorts \(WIP Feedback Wanted\)](#)

yellowbelly - December 13, 2025, 3:47 am

Hi everyone,

I'm currently working on S1Clip.app, a new tool designed to automatically turn Twitch clips into YouTube Shorts with minimal effort.

The aim is to help clippers save time by handling the repetitive parts of short-form content creation, while having consistent scheduled uploads.

What S1Clip does (so far)

Automatically processes Twitch clips into vertical Shorts

Optimised formatting for YouTube Shorts

Scheduled uploads

Designed to be fast and simple, no heavy editing required

Set once and forget

Current status

? Work in Progress

Actively being developed and improved

Some rough edges are expected

Looking for feedback

I'm opening this up to early testers to:

Try the workflow

Report bugs or issues

Suggest features or improvements

Highlight anything confusing or broken

Free credits

To encourage testing, I'm offering:

? 500 free credits for anyone who wants to try it out and provide feedback

No payment required, just honest input.

Link

? <https://s1clip.app>

If you do try it, please let me know:

What worked well

What didn't

Any errors you ran into

What would make it genuinely useful for you

Thanks in advance to anyone willing to help test it — all feedback at this stage is hugely appreciated.
