Thread: [\[WTS\] Instagram BOT, Automation Software](#)

R5N3T - December 14, 2025, 12:20 am

"BOT 1NST4GR4M NinjaGram"
AUTOMATION SOFTWARE

Why pay more? I provide full-version software with complete features at a reasonable price.

Screenshot [\(Click to View\)](#)

Feature :

? Auto-Follow : Mass follow targeted Instagram users, from any location in Instagram (search results, your feed, another user's followers, or pictures taken at a particular location!

? Auto-Unfollow : Mass unfollow users with various settings using NinjaGram, such as only those who don't follow you back or only users followed more than specific # of days ago.

? Auto-Like : Mass like thousands of targeted and filtered images on Instagram with the click of a button. Auto-like your own feed, monitor a tag, or images from anywhere in Instagram.

? Auto-Comment : NinjaGram is capable automatically leave comments from a preset list on your targeted photos. Also, spintax allowed!

? Superlike Feature : Target users and like their recent photos (you can specify how many). Extremely effective method to gain more followers. Much more effective than just liking a single photo!

? Auto-Accept Requests : If your account is set to private, then your follow requests can accumulate drastically. With NinjaGram you can automatically accept all your pending follower requests in one go!

? Targeting Filter : Filter users by number of followers, followings or posts. Filter pictures by number of likes and age (posted in the last 0-99+ days).

? Monitoring : Monitor a tag or location search and automatically like new pictures or follow users immediately. This ensures you are targeting only active users!

? Location Search : Automatically like pictures taken at a certain location, or follow users posting from a location.

? Image Resizer : NinjaGram includes a general purpose image resizer. Resize any image(s) to custom dimensions for posting on Instagram or anywhere else!

? Account Protection : Use a random time delay (pause) setting as well as "breaks" at intervals to stay under the radar and avoid getting flagged for spamming.

? Proxy Privacy : Although not strictly necessary, you can hide your IP if you feel the need. Private proxies are also supported.

? Blacklist / Whitelist : Avoid unfollowing your own known friends, or following, commenting, etc. certain people you would like to avoid.

? Import / Export ID's : Have a third-party list of users you want to follow? No problem! You can also export the usernames or photo ID's to a text file to process elsewhere.

? Multiple Accounts : Perform all these actions on one account, or use multiple accounts simultaneously.

? Auto-View Stories : Automatically view the owner's latest story. Great feature to get on the potential follower's radar.

? The price for this software is \$5

? Accepting Cryptocurrency

? Send me a PM if you're interested.

Cracked version sir ?

PappyProxy - January 24, 2026, 5:55 pm

more interested in the gmails attached to accounts on your bot.

do you have per say 100 gmails for sale?
