Thread: [Anyone Here Using Termux for Cybersecurity Learning on Android?](#)

R5N3T - December 15, 2025, 5:13 am

Just curious, how many of you are using Termux on Android to learn or mess around with cybersecurity stuff?

No one. Just take Pixel, OnePlus and flash nethunter then u will be able to mess around.

R5N3T - December 15, 2025, 5:29 am

Got it! Thanks for the tip, I'll check it out.

DramaKing - December 15, 2025, 6:00 am

I used to use Nethunter, but there are a lot of tools just for Termux that I don't really miss it on my current phone. I need to upgrade, so I'll probably be installing it then.

Phishing is currently allowed. Brute force has always been allowed, especially since so few websites are vulnerable to it.
