Thread: [\[WTS\] TikTok BOT, Automation Software](#)

R5N3T - December 15, 2025, 11:14 pm

"BOT T1kT0K NinjaTok"
AUTOMATION SOFTWARE

Why pay more? I provide full-version software with complete features at a reasonable price.

Screenshot [\(Click to View\)](#)

Feature :

- ? Auto-Follow : Mass follow targeted TikTok users from any tag search in TikTok or import your own custom list.
- ? Auto-Unfollow : Mass unfollow users with various settings, such as only those who don't follow you back or only users followed more than a specific # of days ago.
- ? Auto-Like : Mass like thousands of finely targeted and filtered videos on TikTok with the click of a button. You can also monitor your feed or any tag and like new videos as they are published.
- ? Superlike Feature : Target users and like their recent videos (you can specify how many). Extremely effective method to gain more followers. Much more effective than just liking a single video!
- ? Targeting Filter : Mass unfollow users with various settings, such as only those who don't follow you back or only users followed more than a specific # of days ago.
- ? Monitoring : Monitor a tag search and automatically like new videos or follow users immediately. This ensures you are targeting only active users!
- ? Auto-Schedule Uploads : Automatically schedule and upload your videos from a folder on your computer.
- ? Track Usage & Growth : All usage data is tracked and charted. See which of your strategies are the most effective over time.
- ? Targeting Options : Target users or videos from a tag search, users who commented on a particular post, your feed and your own custom lists.
- ? Multiple Simultaneous Actions : Follow, unfollow, like and upload simultaneously, each with their own time delay settings.
- ? Account Protection & Secure : Use a random time delay setting as well as "breaks" at intervals to stay under the radar and avoid getting flagged for spamming.

? Proxy Support : Although not strictly necessary, you can hide your IP if you feel the need. Feel free to reach out to us for recommended proxy providers.

? Blacklist / Whitelist : Avoid unfollowing your own known friends, or following, liking, etc. certain people you would like to avoid.

? Import / Export ID's : Have a third-party list of users you want to follow? No problem! You can also export the usernames or video ID's to a text file to process elsewhere.

? Multiple Accounts : Perform all these actions on one account, or use multiple accounts simultaneously.

? The price for this software is \$5

? Accepting Cryptocurrency

? Send me a PM if you're interested.

Note:

? This is a digital product

? Delivered via pm/email

? Download link provided through Google Drive

? The email will be sent after confirmation via chat

Ninjatok interacts directly with the web app / cloud system, not through a physical Android device
