Took a break from my online life for the holiday to spend time with family. How has everyone been?

Another day in the life...

My room... lol

It's PSX Classic Mini Mod with all games and some linux projects, cat food etc. Very busy... lol ?

Also tested my website and it works as a free pub pic / img host. Feel free to use it if you want.

It removes all meta data etc...

Welcome back!

But how could you let your room turn into such a warzone? The scene looks like one of those rooms you see on TV about hoarders. ?

JoshAllen - December 16, 2025, 2:43 pm

I thought the picture was the vacation lol.

What did you do?

Limited space for the amount of projects I am doing... ?

What did you do?

It was part of my vacation. I was modding my psx mini and building a LAMP Ubuntu server for development purposes.
