[EDUCATIONAL] - Beginner Friendly Video of Malware Deobfuscation

Hey guys ?

You might have already seen videos from this creator, but I just discovered her channel and felt it was worth sharing. She makes extremely good malware deobfuscation videos, and they're very well done.

Do you remember back in school when girls always seemed to have nicer handwriting? This kind of feels like the same thing ?

The code she ends up with is super easy to read, she explains every step clearly, and shows exactly what she's doing and how she gets from one point to the next.

Overall, really solid walkthrough.

The videos are very easy to follow and pleasant to watch. I'd definitely recommend this channel to both beginners and more experienced engineers.
