Thread: [Looking for the unrestricted AI WormGPT v4](#)

APIron - December 20, 2025, 5:22 pm

I've heard from multiple sources now that there is a custom premium unrestricted AI out there that is mainly focused on cybersecurity and isn't too concerned with the legality or morality of your questions.

Such an AI would be of great help with my project but I have only found it at one spot and I'm just a poor man. So I'm hoping you guys will start looking too and share this piece of tech with me.

Here's an image of the thing:

BaconGuy - December 21, 2025, 3:06 pm

It's not actually good at anything. You will have better success using jailbroken GPT or Gemini.

How do you know? Did you get to try one? Also, where does one find such a jailbroken GPT?

No I haven't seen it yet. So it's either a very closed off thing or just complete trash lol.

ObsidianMD - January 8, 2026, 11:47 am

Running a local model is best if you want to be able to tweak it yourself, but if you want to jailbreak an existing model, looking up a collection of jailbreak prompts on GitHub would work as well.

G-DillahKillah - February 8, 2026, 6:44 pm

<https://venice.ai/chat>

Or if you want to jailbreak an existing model you could try this...

<https://github.com/p-e-w/heretic>

cryptoclipper - March 7, 2026, 2:06 pm

venice.ai/chat
or omegai.me or search github wormgpt you will found a lot python
