1x 50€ Steam Card + 1x 20€ Riot Services Card x Crypto [BTC - USDC]

I will not go first, if you wish to use a middleman fees is on you.

Is possible to pre-order custom cards such valorant, league of legends, amazon etc.

[contract=tid]Start Contract[/contract]

What do you mean pre-order custom cards, can you buy RIOT points with this for LoL?

If so, what percentage are you wanting?

By depositing a max of 24hours (usually less) a percentage upfront you can book some cards and get better deal as trust is always repaid and help me to keep sales organized better will less stuff to take care.

LoL Cards belong to riot services so they can be redeemed on any riot game and the balance can be spent as you wish with no limit of any kind.

Possibly the trade would be 1:1 for immediate deal, 0.98 if bundle , 0.95 if 3-5 pcs , 0.90 for 10 + pcs , pre order give you guaranteed 0.1 0.15 discount.

Quantity is not very generous but things are legit and is not gonna happen that a one nice day you log in and you find your skins taken back by riot for example cause you bought scammed rp / skins.
