Where do you guys think BTC, ETH and XMR are going to go to in 2026?

I have been told that xrp ripple was the one to put my money in, does anyone happen to know if it is in fact gonna be a major platform that handles all of our big transactions and that our government is gonna use them making them a leading platform.

You should change your pfp if that's the case.

You've been talking to the wrong people.

XRP holders are akin to cultists. These cultists try to draw in uninformed crypto investors into thinking XRP is great. They probably convinced you that the world's banking rails will be moving to XRP and that large cross border payments by institutions are already happening regularly on XRP.

It's all lies.

XMR to \$1,000 for sure UwU.

SonyZoomCam - December 28, 2025, 12:22 pm

lets hope up, would love to see btc breach \$100k and stay above \$100k. btc didn't do much this year, started at \$87k and remains around \$87k almost a year later

I see no reason why it shouldn't continue to climb. It's already huge and it's not like everyone really even knows about it yet. Especially more secure coins like xmr

Unfortunately I see a continued bleed from BTC and that being a huge drain on alts. Sub 70k, and who knows how badly alts will get clobbered.

Hope it isn't true but that's how I feel! I sold everything in November
