Thread: [crypto drainer](#)

C4SHM8 - December 27, 2025, 2:51 pm

Hello Gents,

I want to buy crypto drainer metamask, trustwallet, Ton, Tron mainly.

Should be as easy as possible to be managed.

Please message me only if you are with good reputation and old accounts otherwise I'm not answering..

Before buying I'd like to test it for a day and I will need support first few days, after that weekly. we can agree on a price for the drainer and price for support...

Also escrow or middleman.

so u drain all the huss ?

AP29 - February 21, 2026, 8:53 pm

Look if you are just stepping into draining i strongly suggest you not to buy the drainer itself i have seen people wasting 2k-4k on drainers and end up with nothing. So there are few very well known drainers for example angelferno who offer you 80-20 split and are super easy to setup all you need to do is to contact their TG and send them your erc20 address (where you will get you 80% drain) and you will be provided with their cpanel login which is super easy to setup. all you will be needing is a server and a domain to start that will not cost more then \$20. The splits are auto, TG push notification on every connect and drain, regular updates and bypasses they do. If you are thinking about how you will make the websites to connect your drainer script they will provide ? let me know i

will send you some good ones for free. Once you are comfortable and know the ways around and start getting good results, made good money and don't want to split the 20% then you can go for a drainer purchase.

This is some pretty good advice.

People think that because they buy something then boom they will be rich overnight.

Ofentimes it's not that easy and you need to learn how to get the right traffic.
