Thanks but I will add the these adobe bastards are scammers and will try to charge your card and hit you with a cancelation fee if you do not cancel within the free trial. Also will do random charges to your card. I had to cancel a credit card and report to the fraud dept a few weeks ago!

Ok, so I'm confused. What's the catch? Is it a pay by usage model? I don't see how they can just offer it completely free and survive off ad revenue.

Even still, carding it to then just give it away free? Have you used it? I mean, if it works and theres no hidden catch Ill sleep just fine knowing Adobe is getting screwed. Just doesnt make sense to me

Honestly, with so many AI tools available now, Adobe has fallencompletely... yet a lot of people still use it And that's usually those who don't know how to use anything else or are simply afraid to change.? Adobe is extremely expensive when you have so many alternatives available nowadays???

I remember my first intro to Adobe through MacAfee anti-virus like it was yesterday. Everyone has used Adobe Reader at one point of their life if they have a computer.

Yes, that's it... with this, I realized you're from my generation? I remember perfectly that famous antivirus ? Did you saw the movie?

Running with the Devil: The Wild World of John McAfee

???
