JoseMar - December 29, 2025, 6:03 am

Over 30,000+ AI Prompts:
Master Coding, Chat, and Automation

Unlocking the Full Potential of AI Prompts:
Learn from the Best

Someone just leaked the full prompts from Cursor, Perplexity, Lovable, and other major AI tools. These aren't basic examples, they are actual prompts that companies charge thousands of dollars for.

Now, over 30,000+ lines of prompts are freely available on GitHub also updated every month. The best part? You can see exactly how the top AI companies structure prompts for reasoning, coding, chatting, and automation.

By studying these patterns, you can learn how pro engineers approach prompt creation and apply their strategies to your own AI tools or startup. You don't need to reinvent prompt engineering; you can simply learn from the companies who have already mastered it.

If you want the prompts for yourself, check this:

Then just go click to ChatGPT Folder, and there you have all prompts

Thank you, mate, I appreciate it. Honestly, now all you really need is to know how to use some prompts, and how to tweak them a bit to make things more private.

I hope it helps the forum, that's why I post so many threads in the end, to help people out.

Thanks for stopping by to say thanks. Have a great day ?

Artical - February 23, 2026, 7:50 am

Thanks for this, was looking for some prompts and this is more than I could've imagined :P

Appreciate your help!

consteval - April 2, 2026, 9:02 pm

this is really helpful thanks

ProxyLand - April 15, 2026, 12:52 am

Thnx man show some love this is a good one for fella's to start out and learn structure prompting and architecture of the prompts! Thank you too, I'm going to rip this and take a look.

ohyesiagree - August 27, 2026, 9:27 pm

Thanks for sharing. Appreciate your help!

apoel1986 - September 25, 2026, 11:46 pm

thank you for sharing brother... i will def have a look
