Thread: [how can i load bots to my botnet](#)

1313131 - January 1, 2026, 2:33 am

so uhh im a newbie in these botnet things i want to load some bots to my botnet for free i have a vps how can i do that

DeathPenalty666 - January 1, 2026, 2:42 am

With mirai/qbot like for ddos you need to find exploits, a ssh-telnet scanner/bruter and find list of those devices. Then you can upload or use RcE to infect them and load them

1313131 - January 1, 2026, 2:48 am

i tried mirai but where do i put my ips or smth like that like i run the loader it js says all 0

What of these I need download? Are these for linux?

1313131 - January 1, 2026, 3:49 am

i did that but still the same this is my output on the loader
