Thread: [Exciting News: Manus AI is joining Meta!](#)

**Rsynced** - January 1, 2026, 5:41 am

Well looks like my favorite AI has now sold out to META and my best guess is that META will be mining our data and code for profit. They say they wont but I don't believe a fucking word from these META guys. Thakfully I have my AI rig in the works to be finished within the next month or so... Canceling my subscription to Manus Pro today.

EMAIL I RECIEVED:

Quote:Hi there,

We have some incredibly exciting news to share: Manus is joining Meta!

When we started Manus, our vision was to build a best-in-class product that solves the daily operational needs of businesses through autonomous, general-purpose AI agents. To date, we are proud to have processed more than 147T tokens and created over 80M virtual computers to help our users execute complex tasks like market research, coding, and data analysis.

Joining Meta is the logical next step in our journey to scale world-class AI products. By partnering with Meta's existing teams, we can integrate Manus's technology across a global AI portfolio, bringing our autonomous agent capabilities to millions of businesses and creators.

What This Means for You: Our commitment to our subscribers remains unchanged. Here is what you can expect:

- Service as Usual: Manus will continue to sell and operate our product subscription service through our website and app. Your access to our tools will not be interrupted.
- Continued Innovation: By joining Meta, we will have more resources to scale our business, improve our product offering, and continue to delight our customers.
- Data Privacy & Ownership: You continue to own all content you create when using our product. Our commitment to data protection and privacy remains a top priority as we move forward together.

We are incredibly grateful for your support and look forward to this next chapter as we continue to redefine what AI can do for your business.

For more details, you can read our full announcement [here](#).

Best regards,  
Xiao Hong  
CEO, Manus

You going to request data deletion?

**The Pact** - January 1, 2026, 6:21 am

Meta AI kind of sucked and I guess they knew it so they bought a great AI.

Idk, I mean not sure what they will do with my code and art. I knew the risk of being poor using the rich mans computer systems to begin with... lol

Maybe that's true, out of my hands, I am not looking forward to it though, like if they start turning it into some social media type of business I will go elsewhere.
