Thread: [Hacking a text based mafia themed game.](#)

Ingar Karlsen - January 1, 2026, 12:35 pm

Hello everyone, for the past 10 years i have tried to learn the ropes to hack a specific game site, which used to be pretty popular back in the days, a sort of, pay to win, game. the game as it stands today is completely dead and the pay to win has been removed, the admin never gave it much attention over the course of 18 years, and is currently inactive. the last thing he did i believe was adding ssl to the server back in 2016. so with the little experience i have i am wondering if anyone else is up to the task of trying to hack it. regards, ingar.

Start here. /drugs.php script. Monitor the network traffic and try to figure out how the backend works, realistically there's a ton of places to look lol.
