Nexus Crypter is a professional software for protecting softwares/applications, ensuring its safety against reverse engineering and analysis. You can kill any AV you want with using the Nexus, we have solutions for killing the AV before running your payload, including Antiviruses like - Windows Defender, Avast, AVG, Avira and others. There is Automated payment system in the website also chat system for reaching out to admin (username of the admin is : "Nexus") or talking with your friends securely while enjoying the 0 log policy and full privacy & safety.

We offer long term solutions for RATs, Stealers, HVNC, Backdoors and everything else. We support everything - x64 x86 architectures, Native and .NET applications. Basically, things like Async, Quasar, Pulsar, Rhadamanthys, Xworm, PureRAT, VenomRAT and etc all will work perfectly.

EV Sideload stub will grant you guaranteed Smart Screen Bypass. Both stubs bypass Windows defender and other Antiviruses. There is real polymorphism and uniqueness. Each stub will be generated & compiled randomly for each request and you can witness that while crypting the same payload twice.

Windows Defender Test:

CutePenguin - January 4, 2026, 4:07 pm

Looks great. Sucks you do not have past experience here with contracts. I would recommend you send someone a vouch copy.

(Not me. I do not even have any files that need crypting).

Justified - January 5, 2026, 1:35 pm

Yes!, it can bypass smart screen. Its Guaranteed.

casperr - January 8, 2026, 1:30 am

BIG VOUCH for this guy ,Really happy with this guy is a genius . The seller was super kind and supportive from start to finish, answered all my questions, and made everything easy. The tool works great and does exactly what I expected. Definitely recommend.

Basically every in Kleenscan. Avast/AVG/Avira/Avast/MalwareBytes/Kaspersky and etc

Stanley - January 16, 2026, 10:09 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

malleyr62 - January 17, 2026, 11:05 am

had anyone tried this crypter and work fine and work as stated i want to buy it so anyone let me know here thanks

Great Crypter and the developer is very supportive. This is the best I've used so far

greatgatsby - January 26, 2026, 8:28 am

i am interested Standalone Crypt if it has Persistence Startup
Can you give a vouch copy? I'm willing to write a detailed review

Rs6 - February 11, 2026, 4:39 am

Hello, since i have a problem with xworm as i wrote here:
<https://hackforums.net/showthread.php?tid=6319572>
can i test it before buy?

Justified - February 11, 2026, 7:08 am

Hi, That error is usually caused by AMSI, which prevents loading malicious .NET plugins of XWorm. You won't face that issue while using my service. Plugins will work and Everything. You still can try the single crypt as an overall start.

anaumarcin - February 12, 2026, 1:35 pm

Is spoof encrypted file extension also possible?

jackbaur5757 - February 16, 2026, 5:10 am

Are you still selling it ?

drewkasp - March 2, 2026, 4:57 am

Do you offer a single crypt?

Yes!!!

Justified - March 19, 2026, 2:29 am

Reminder : We've got VBS/BAT/JS/CMD/JSE/WSF/VBE/HTA outputs too. Enjoy the daily refunds and updates. Works with any x64 x86 native and x64 x86 .NET and the main perk is, we offer automated free scans (by kleenscan.biz) for every extensions.

coocochoi - March 23, 2026, 5:02 pm

Looks like an interesting product, any vouch copies still available?

am00 - March 23, 2026, 5:31 pm

It takes a lot of effort to refud all of that every day, I know how complicated it is q-p

Ahh, Thanks for caring but since the beginning of sales and the release of those outputs, i only had to refud once and since that, the stubs are keen on being undetected. The Randomization & Obfuscation is soo good and the almost %100 differentiation of builds. Same for my Standalone and Sideload. i've been onto these stuff since the COVID Imfao(im lowkey crazy). but still thanks brother.

(Mar 2, 2026 05:57 AM)drewkasp Wrote: [\[CITE\]](#) Do you offer a single crypt?
I do

(Mar 23, 2026 05:02 PM)coocochi Wrote: [\[CITE\]](#) Looks like an interesting product, any vouch copies still available?

Sadly, i have stopped doing vouch copies.

Windows Defender Test:

[Video: <https://www.youtube.com/watch?v=n8r470l0yCI>]

VBS/VBE/JS/JSE updated - native x64 x86 | .net x64 x86 | works .

kizzyman45 - April 11, 2026, 5:23 am

nexus has't gotten the recognition it needed yet, this cryter is the best i have used sofar, I Crypt once or twice in aweek, i use crypted file for three to four days without detection. kudos, hope you don't change like kgb did

Justified - June 25, 2026, 1:11 am

Added Sideload Options.

Justified - July 1, 2026, 12:04 am

Sideload is back with good results on runtime.

https://kleenscan.biz/runtime/scan_result/9807f506d6ec3a652996273367bc94ceaa57b011f5b911aff8878196b0eab833
