Thread: [Offering Development Services: Malware dev, crypting, ...](#)

MrVictus - January 5, 2026, 4:28 am

Hey everyone!

I'm a software dev and malware dev specialized in C/C++, C# and powershell scripting, I'm looking to connect with some guys who are interested in my services and want to work and grow.?

aron666 - January 5, 2026, 5:03 am

very cool,how old r u?

Hey buddy, I am interested in deving a tool in C and PHP. WE can partner as I have a high ticket cashout method I work on personally. Just need good tools that bypass WD primarily. No fancy GUIs or weird things like that. All that is needed is constant development in which I can help you during the process too. Pls let's talk if you are really good with C and PHP.
