Thread: [FREE FUD File Crypting | Full Guide/Method \[175 slides\]](#)

Nocturne - January 7, 2026, 10:20 am

If anyone wants a full extensive crypting guide to create their FUD file including RAT client files, I should suggest that you have look at this free PDF slideshow which goes into great detail. There are 2 files - Read 1 to understand basics and 2 for detail. Let me know how it goes!

175 slides? That's a lot. I assume some of them are with source code of decently undetected shellcode execution and PE injection methods for very detected shellcode/PE, right?

It's actually 258 slides including the basics, and yes the technical slides dive deep into making shellcodes/launching and EXE Injection along with malicious PE files, loading encrypted payloads...etc. It does get a lot with the countless methods but definitely worth the read.

tokha555 - February 11, 2026, 8:45 am

Big thank you

CL1B - February 11, 2026, 10:27 am

Bought the slides and can confirm this will put any skilled developer in the right path. The first slides go over the age old social engineering aspect in context of penetration. And the second slide goes over EDR detection vectors and loaders in general. Some of the tips are quite useful as well.

r00tUA - February 24, 2026, 10:42 am

thats alot of slides, some of this must be source code no? curious regardless

Doghan - March 6, 2026, 9:59 am

time to earn bytes

Phobia_ - March 6, 2026, 10:57 am

Might give this a look shortly

kode405012 - March 7, 2026, 7:01 pm

thanks

kriminaltetic - March 9, 2026, 8:02 am

How can I earn bytes?

TP-4013 - March 10, 2026, 12:03 pm

Is it a method to write your own crypter, or it includes how to find FUD crypters?
