Thread: [Tetra RAT | FUD Windows RAT | Integrated .exe Binder](#)

Pop Shells - January 9, 2026, 4:42 pm

Welcome to the official sales thread for

Tetra RAT

Tetra RAT is a powerful RAT for Windows 10 and 11

Tetra RAT is easy to use with a robust host of features.

Tetra RAT is not a modification of any other RAT.

The stub and client were coded from scratch by Pop Shells.

-Features-

File Binding:

Stubs are automatically binded to the Exe of your choice upon generation. You are given full control over the icon, title, and version of your stub.

FUD on runtime:

Due to Tetra RATs design, it is fully undetectable on runtime. The stub installs all associated Tetra RAT files and super hides them on your bot. One click of the stub installs Tetra RAT and replaces itself with the original file you binded to it. (As of yet, the stub itself is FUD, but crypting is still best practice)

Hidden Startup:

Tetra RAT is persistent and starts up every time your bots start with a super hidden startup.

Multiple Bot Support:

Tetra RAT can support as many bots as your SFTP server can handle. You can connect to individual bots or connect to all bots at once.

Screenshot:

Tetra RAT allows you to capture real-time screen shots from the bot of your choice.

Microphone Recording:

Tetra RAT allows you to capture real-time microphone recordings from the bot of your choice.

Task Management:

Tetra RAT allows you to view and kill tasks running on the bot of your choice.

File Management:

Tetra RAT allows you to search directories, upload or download files to and from those directories, and run files within those directories on the bot of your choice.

Uninstalling:

Tetra RAT can be fully uninstalled from the bot of your choice.

Educational:

The source code for both the client and stub is included with Tetra RAT.

Customer Support and Updates:

Tetra RAT features exhaustive help documentation, but Pop Shells is loyal to his customers. I will respond to and process all customer questions and concerns in the order they are received. I will also provide everyone who purchases Tetra RAT with all future updates for free; and I have many features planned for the future.

End User License Agreement:

By operating Tetra RAT, you agree to run any and all files associated with Tetra RAT exclusively on your own legally owned and administrated personal computers, unless otherwise given express permission by the PC owner and administrator. Any attempt to distribute any files associated with Tetra RAT to any personal computers you do not own and administrate, or have not been given express permission to administrate by an owner/administrator is a strict violation of this end user license agreement. Any attempt to use any files associated with Tetra RAT to violate anyone's reasonable expectation of privacy is a strict violation of this end user license agreement. Any misuse of Tetra RAT, legal or otherwise, is a strict violation of this end user license agreement.

Stanley - January 9, 2026, 11:01 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Is it possible to ask for a vouch copy?

I'm curious how this tool works.
