This is a crypter and AV killer at same time?

Cyber Products - January 9, 2026, 5:13 pm

Cyber crypter is for normal FUD encryption like any crypter in the market, It doesn't kill the antivirus permanently.

This is not a crypter, Its an exploit to forever bypass antivirus and no crypter is needed.

It works like this: FILE IS EXECUTED => KILL ANTIVIRUS => DISABLE ANTIVIRUS SERVICES PERMANENTLY => DOWNLOAD AND EXECUTE YOUR NON CRYPTED PAYLOAD = FULLY BYPASS BECAUSE NO ANTIVIRUS IS ACTUALLY RUNNING.

LuaClass - January 9, 2026, 5:15 pm

Vouch, works very nicely. Tested on a magnitude of AVS.

Awsome!! So if someone use the crypter + killer it make this almost impossible to detect forever? Only suggestion i have would be to add pre-selected location to install and add custum directory for install. Jeez it look awsome man good work as alway!!

It already operates at an exceptionally professional level, and this product is well on track to becoming a market leader in a very short time.

purchased the 1 year package for 2,500\$, product has been delivered and it's working like charm, i tested it on many premium antiviruses and it bypassed and killed all of them.

highly recommended, purchased his other products too and they are all high quality.

would love to see more products coming from you.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
