Thread: [\(Want to Buy\) delete/get discord server banned](#)

johndoeman805 - January 10, 2026, 7:23 am

if anyone has the skillset/knows an exploit to do this that would be great? (maybe like a DDOS?)

-dm me for details/price etc ?

I have done this before for ig tg accounts groups etc so take my advice bro banning a discord server, i would say you should drop the idea unless the group is very much doing illegal buying selling sharing or anything against discord rules there is no change you can get this done.

Dude we are on a blackhat forum! Not Sunday School! Christian Attitudes of "forgive and forget brah!" do not really have a place on a blackhat website! (plus its not very Christianly to install malware/do credit card theft/ddos attacks/gamble and half the shit blackhats do on here?. Last time I checked I don't think Jesus and his apostles installed malware on people's computers in ancient Israel?). What I am trying to buy is very very very mild compared to the other wants that 1/2 the users on here are willing to pay for. I simply want a discord server removed to fuck with some people. (inevitably they will rebuild it/or appeal/get their server back) but it will be fun just to have it get nuked just to be an asshole lol

-if it is against your christian morals I understand (but then again why the hell are you on a blackhat website? volunteer/help the poor at your local church's soup kitchen instead!?)

Let me break it down for you if you didn't understand what i meant.

I have done this before for ig tg accounts groups etc (I have banned TG and IG accounts pages groups in the past and its totally doable)

"so take my advice bro banning a discord server, i would say you should drop the idea unless the group is very much doing illegal buying selling sharing or anything against discord rules there is no chance you can get this done." (Since you are talking about discord servers, its nearly imposable to ban one with mass reports even with rotating ips as discord staff is super slow/unresponsive and the reports are checked by their staff manually. So unless there are illegal or banned stuff being traded in the server or unless the server violates discord rules they won't ban it no matter how many num of reports you send)

Next Time please read the comments carefully or use a translator if english is the problem.

ok valid point? however is there an exploit in order to technically have the server be in violation? (I don't even care about revenge) I'm just asking from a computing/technical stance?

-I guess what I am trying to figure out is what makes it (usually) easier for one to find exploits to ban ig/tg groups but harder for discord?
