Thread: [CleverTunnel DDOS Protected / No Logs / Unlimited Bandwith / Residential IP](#)

Gwapo - January 10, 2026, 4:01 pm

Hello Hackforums,

It's been a while! I'm excited to return and introduce a new VPN service I'm now offering.

Service Overview:

A streamlined, high-performance VPN designed for privacy, security, and accessibility.

Getting Started is Simple:

Download the client.

Message me directly.

I will provide your unique access key.

Launch Promotion: Vouch Copies

To build trust and demonstrate the service, I am offering 20 LIFETIME vouched accounts at no cost. These are first-come, first-served.

Pricing After Vouch Phase:

Following the vouch period, the service will be available at a starting price of \$2 per month.

Key Features:

Strict No-Logs Policy: Your activity is never recorded.

DDoS Protection: Enhanced resilience against attacks.

Unlimited Bandwidth: No throttling, no caps.

Modern Protocol: Utilizes the efficient WireGuard® protocol.

Global Network: Servers in multiple locations.

Residential IPs: Includes residential IP addresses from the USA and Romania for enhanced authenticity.

Optimized Servers: Includes unprotected servers specifically configured for low-latency gaming and high-speed streaming.

I'm looking forward to reconnecting with the community and welcome any questions via private message or thread post.

[Download Client here.](#)

Best regards,

Gwapo Since 2011

Very slept on product ya'll need to hop on this! Great VPN awesome connection had 20-25mb download 15mb upload on a france server im in USA. The VPN passes the proxy test on alot of sites but the ones it does not it has a great trust rating and is green and not flagged. Very high quality product would love to see port forwarding introduced and this would be golden, could up the price as well considering the speeds if port forwarding is in since it'll bring alot more people. definitely going to be using this thanks again for the vouch copy. 10/10 Product no glazing this is the only VPN ive seen on HF that actually connects well and isnt just some crappy public IP's that get blocked everywhere haha. Tested multiple servers in EU all great speeds.

Thank you so much for taking the time to give the product such a close look. I know your schedule is demanding, and I genuinely appreciate you making room to provide your excellent review.
