you cant ddos a discord server. you can get a bunch of peopl to join but it wont have any point, it will just take a lot of time to create the acounts and do this. Better report the server

problem with reporting the server is discord just sticks its thumb up its ass lol and does not respond to reports. Plus if a server is doing nothing wrong the reports do fuck all. I want to ban a server with moderators I have an axe to grind with.

-is it childish/petty YES extremely. But hey we are on a blackhat forum here not bible study lol

-I heard something like if a buncha guys go on spam/possibly you can overwhelm/even ban the server. Though not sure how true this is etc.
