In your opinion what are the best vampire games you've played so far?

Can't say I have much experience with vampire games. The only ones that come to mind are Redfall which was quite a disaster of a game if I remember correctly, Castlevania games, Vampire The Masquerade games, and then Vampire Survivors or a bit technically? I've only played the last one on that list and while I wouldn't say it's actually vampire heavy, it's an amazing game.
