Does anyone know where to get a free drainer? I downloaded the julia drainer from the mega file on here but it doesnt work. Theres no installer in the package/folder.

You will probably not find a working drainer for free... maybe if you are good at coding you might be able to tweak one for needed workarounds

I trying to get my hands on finding a bot net for my silent miners since I have a couple thousand leads. If some some one can find YouTube videos with free bot net guides with downloads that'd be great since I can't find any all the ones I find are merchants on telegrams and their bs.

Cryptograbber even has a thread here and across all skid forums.

Angel Drainer is still going strong today, You can find them on expl or lolza but keep in mind that draining is much more difficult than it was in 2021. Especially with all of these smart contract checks--they heavily rely on SE or live calls.

any free drainer will have a backdoor
get a proper one , pay for it and only mind your traffic
i persnally use quark lab drainer

"just" does not guarantee success. And it is much harder than it looks.

Infact, there are many many kinds of checks and balances you need to go through first.

My suggestion is; don't.
