Full Domain Takedown Service

We offer full domain takedown services, resulting in the permanent disablement of entire websites, not just individual pages, posts, or URLs. This service is intended for high-impact cases where partial removals are ineffective and a complete shutdown is required.

Ideal use cases include:

Scam, phishing, and fraud websites

Blackmail, extortion, or doxxing domains

Impersonation sites (personal or corporate)

Malicious content networks, clones, and replicated sites

Service details:

? Entire domain taken offline (no partial or page-level removals)

? Suitable for personal, legal, brand protection, and enforcement-related cases

? Effective against Blogspot sites, expired PR domains, and cloned/replicated websites

Pricing: \$2,265 USD

Turnaround Time:

Estimated: 1–3 days

Maximum: Up to 30 days, depending on complexity.

Yes, it will be easier if the website doesn't follow TOS/rules, etc.
