Nexus Crypter is a professional software for protecting softwares/applications, ensuring its safety against reverse engineering and analysis. You can kill any AV you want with using the Nexus, we have solutions for killing the AV before running your payload, including Antiviruses like - Windows Defender, Avast, AVG, Avira, and others. There is Automated payment system in the website also chat system for reaching out to admin (username of the admin is : "Nexus") or talking with your friends securely while enjoying the 0 log policy and full privacy & safety.

We offer long term solutions for RATs, Stealers, HVNC, Backdoors and everything else. We support everything - x64 x86 architectures, Native and .NET applications. Basically, things like Async, Quasar, Pulsar, Rhadamanthys, Xworm, PureRAT, VenomRAT and etc all will work perfectly.

EV Sideload stub will grant you guaranteed Smart Screen Bypass. Both stubs bypass Windows defender and other Antiviruses. There is real polymorphism and uniqueness. Each stub will be generated & compiled randomly for each request and you can witness that while crypting the same payload twice.

Windows Defender Test:
