Hi , please I'll like to ask about redoffsec , want to confirm if the output of exe can be a standalone and still bypass smartscreen without having to upload in a zip or rar achieve and extract with with dll ?

To bypass smartscreen can I use a single exe or have to upload the zip and extract exe and dll in same location ?

verification failed

no support at all it dont show the support anywhere cant make a ticket cant contact any one cant login bot cant do nothing

when i click support in the app it ask me to login to login i need to verify but cant verify

telegram bot :
LOGIN FAILED

REQUEST FAILED WITH STATUS CODE 429

ENTER YOUR ACCOUNT KEY TO TRY AGAIN.

CL1B - April 14, 2026, 2:09 am

That' because support is only in app. Not telegram or on site.

429 Means you're rate limited, most likely because you're using a shitty flagged RDP that Cloudflare doesn't allow.

martigo333 - April 14, 2026, 2:42 am

I paid for the crypting Engine plan but haven't received any support. There's no clear way to contact support, submit a ticket, or get help within the app.

When I try to access support, it asks me to log in. However, the login process requires verification, and the Cloudflare CAPTCHA repeatedly fails or doesn't load properly. This makes it impossible to log in or reach support.

Overall, the experience has been frustrating due to the lack of accessible support and ongoing technical issues with verification.

telegram bot :

I crypted about 3 different files and the scan on Kleanscan shows 5/36 which is not good for the price of \$59 a month.

I've left it but my rating is 3/10 waste of money and time.

That's my honest opinion good luck.

CL1B - April 14, 2026, 3:38 am

Like the ad says, there's no support on Telegram or anywhere else except in app. Which works perfectly, if you can't finish cloudflare turnstile when on a bad IP don't bother support with it. They can't help you with that.

If you'd open the app you'd see the notice from 2 days ago that CE modules have increased detections this week due to maintainer being on vacay.

None the less Sideloader is literally not able to be detected due the nature of sideloading, so whatever you're doing; It doesn't seem good.

I'll personally forward your post to support and so they can set your generators (everyone account gets their own) to inactive [martigo333](#) since you've left it. Goodluck.

For anyone in the same boat: Crypting Engine is a maintained service, not a buy now always same results everyday (not possible, or scam). This is how CE has always been top choice. If you don't

understand this, don't buy. Support will probably also never help you with things like Cloudflare blocks, not knowing what payload to use etc.

Should also be noted that we can literally see your scans, any false claims/sale trashing will instantly lead to termination.

So? This is not a support thread. Wait for support to respond, don't post your support inquiries here. This was written in both the thread as well as the terms yet you dweebs still do this, should get perm banned for breaking terms imo.

Just be patient.

Friendly reminder that contacting support about illegal or disallowed activity is by far the fastest way to get your REDOFFSEC account banned.

Crypting Engine is NOT for YOU if you are spreading shitty miners/malware, even if it's FUD.

Same goes for RED C2, it's not beginner friendly at all and it requires you to be capable of operating traditional C2 or shells and have a good understanding about networks and their protocols.

Can't wait till they go open source.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.
