programs have callbacks, so you can generate a licensed copy that matches 1 user signup and then know if they ran it or not based on whether the program (in runtime) connects to the server

Does this apply to all the apps or selected or programed ones only?

Hackers - January 17, 2026, 6:05 am

It just depends on how people set things up, not sure. Some programs are offline programs, some programs connect. There's no requirement to force a program to track your IP or use licensing or another identification system.

The games are from Google play store. No rat inside of them.

Ghighsmith74 - February 15, 2026, 8:04 am

Still works

Cap - February 15, 2026, 9:44 am

Please don't low quality post to bump your threads. Add value or use the built in bump feature.

Stanley - May 6, 2026, 7:45 pm

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
