[SELLING] NexusBrowser | The Ultimate Headless Stealth Proxy | HTML Injection | Live Stealer Suite

Why settle for simple control when you can own the entire session?

NexusBrowser is not just a remote controller it's a high-performance Headless Stealth Proxy. Host your masked website in full-page mode, load any target URL, and manipulate the data flow in real-time. Designed for advanced operations, NexusBrowser allows you to intercept, modify, and steal data without the client ever knowing.

Advanced Capabilities
Full-Page Masking: Host your masking site as a wrapper. The target site loads perfectly within your environment.

Request & Response Injection: Manipulate JS, CSS, or JSON responses on the fly. Inject scripts to harvest credentials, cookies, and tokens.

Custom Stealer Engine: Configure automated "stealer" injects that trigger on specific endpoints or user actions.

IP Isolation: The client browser never touches the target. All traffic originates from the high-speed headless server.

Haptic & Interaction Feedback: Full mobile/tablet support with vibration alerts for successful captures.

Market Dominance

Whether you are setting up sophisticated drainers or stealers, NexusBrowser provides the infrastructure to operate at scale with zero detection. Rewrite the web as they see it.

Pricing Plans
Weekly: \$49.99

Monthly: \$149.99

Yearly: \$999.99

Lifetime Source Code: \$2,499.99 (The ultimate asset)

Payment: BTC / ETH / LTC / USDT
[contract=tid]Start Contract[/contract]
