Thread: [\[Service\] Elite Pentesting & Security audit | HTB/THM Top 250 | 20+ Certs](#)

SIM-5693364 - January 18, 2026, 4:23 am

About Me:

Offensive Security Specialist with 4 years expertise in penetration testing, exploit development, and post-exploitation.

One of the contributor GTFOBINS [gtfobins\[.\]github\[.\]io](#)

Have over 20 certificates (THM, HTB, Security+, Offsec...) and CTF badges. (First-blood, 1-5th places.)

Services Provided:

Full-Stack Web Pentesting: Deep dives into complex logic flaws, OWASP Top10 2026 (but not limited to).

Network Exploitation: Internal/External infrastructure assessment and lateral movement analysis.

API & Source-code: Hardening the backbone of your applications, source-code risk analysis

Risk Assessment: Provide tailored recommendations for strengthening their security policies and procedures.

The Deliverable:

Executive Summary: High-level overview of your security posture.

Vulnerability Breakdown: Categorized by CVSS severity.

Technical details & Evidence: Step-by-step instructions and videos on how the exploit was achieved.

Mitigation Strategy: Concrete steps to patch the vulnerabilities.

During the penetration test, I communicate every step I take to ensure my client's comfort and safety.

Feel free to contact me via PM to secure your infrastructure today!
