Thread: [MINI CRYPTO CASINO SCRIPT FOR SALE](#)

ciphergames - January 18, 2026, 4:25 pm

This script provides a solid, production-ready foundation that you can customize and expand to fit your own project's vision. (We can help with expansion)

5 Original Games: It comes with Dice, Targat, Tower, Mines, and Plinko (more games in progress). All games use a "provably fair" system so players know they aren't being cheated.

Multi-Coin Wallet: Players can deposit via many different types of crypto (api automatically convert to main cryptocurrency).

Dedicated Node: Thanks to node, you are independent with your main cryptocurrency and practically no payment gateway supplier can block you

Level Rewards Bonus: Players receive XP while they play, they receive a reward for reaching the next level.

Rakeback Bonus: Users receive rewards of house edge back on all thier bets.

Daily Bonus: By reaching daily wagering goal users can boost thier rakeback

Vouchers: Players can redeem voucher genereted in admin panel.

Faucet: Players can claim free crypto whenever thier balance is empty.

Affiliate System: You can give users a link to invite their friends and earn a bonus from thier deposits.

Live Chat: A chat box for players to talk to each other while they play.

The whole site is very fast and only costs about \$10-15 a month to keep online (VPS server).
