Thread: [\[FREE\] Silent GPU Miner](#)

ByteDoktor - January 24, 2026, 8:41 am

I've been building it for the past few weeks but Im not sure if there is much community interest in a project like this, like i normally do the project will be fully open source and available on my gitlab.

This project will be released in the coming days.

Do you think its worth combining the projects into one and creating a project similar to Unams?

Thanks for shares.

idk about worth it/not nowadays, since mining crypto using your gpu home can consumes more electricity.
