I like Gauntlet Legends / Dark Legacy. Pokemon R/B/Y always nostalgic too

Honestly most of my favorite games have been story / action-adventure games. Generally from the PS4 era. Some of the games I loved were RDR2, God of War and Uncharted 4.

When I was a child, I really loved IGI... I enjoyed stealth a lot. Maybe Hitman too, with its different installments.

I have a fair bit of favorite games and for various reasons. Some of them and in no particular order are Diablo 2, OSRS, Chrono Cross, Final Fantasy X, Skyrim, Destiny, Gears of War, Fallout 3, Borderlands 2, and Elden Ring. Some of these immediately came to mind and some after giving it a minute or two of thought. I'm definitely still missing some as well.
