I am a big fan of the nested logo design with the eye, V, and shield, kind of reminds be of the Skyrim sneak indicator haha.

Beautiful design, you get a 10 from me!

Keep up the amazing work [Motusora](#)

This is actually pretty clean. If I saw this on a security dashboard or website, I'd trust it. Definitely feels like a real company identity, not a template logo.

Great design, congrats!!!

Very good work, prime example of a true designer/artist instead of just a "logo guy" ;) 10/10.. I know that client is happy!

You've captured a perfect balance between simplicity and luxury

I quite like the concept but i think the top spacing feels pinched to me.

Not really saying this is the "right" fix by any means just sort of pointing out what i mean by saying

"pinched"

Absolutely amazing, I am a fan of simple but unique graphic work. Its straight to the point and out of the way.
