Thread: [How to reveal real identity with this info?](#)

barca1220 - January 25, 2026, 10:18 am

Hello,

I have some info about person and would like to find real name of that person (and hopefully FB account or something)

I have:

First name

civil picture

email (probably not person "official")

IP adress

District where he lives.

Any tips how to try to find with this information?

Omniscient - January 25, 2026, 10:19 am

What country is it? You said "district", which isn't helpful.

I'm sure plenty of members here can give you some advice. If someone offers to do it for money, make sure to use HF Contract and potentially a middleman. Scammers are very much attracted to posts like yours.

Thanks. Maybe someone has some ideas on how to get an identity in that country.

Good luck.

barca1220 - January 26, 2026, 10:41 am

I found exact city. But still did not found his socials accounts.

in r/osint subreddit they have region specific osint kits, you might wanna check that out!
