I Hope Double Fine Keeps Getting To Make Weird Games Forever

Xbox delivered the first big showcase of the year with its Developer Direct, and amid rumors that the event would highlight three of its most-anticipated games, there was plenty of speculation that it would also show off a secret fourth game as well. That speculation proved correct, as the showcase offered the first formal and lengthy preview of Kiln, the next game from Double Fine. The madcap party game is coming sometime this spring, and while we'll have to see how it turns out, the presentation itself stood out as a testament to the qualities that make Double Fine so special in this industry. I'm not too familiar with Double Fine and this game doesn't really interest me, but I of course wish them the best of luck with it. I had a search to see what all games they've done in the past and as far as I can remember from those listed, Brutal Legend is the only one I've played. I had actually totally forgotten that game existed lol. Shout out to Jack Black. Of the others listed, I am familiar with Psychonauts as well.
