Thread: [\[VIP SERVICE\] PREMIUM CRYPTO TRAFFIC DIRECT SOURCES | NO BOTS | 2026 TOP CONVERS](#)

SIM-5724601 - January 28, 2026, 4:36 pm

Are you tired of "Global" traffic that doesn't know what a seed phrase is?

Stop wasting your budget on junk. We provide Direct Source Crypto Traffic from high-traffic faucets, exchange blogs, and crypto-gaming platforms. This is active, high-intent traffic ready to click.

? Why Our Traffic?

100% Direct Sources: No redirected expired domains. Real people on real crypto sites.

Niche Targeted: Our users are already active in DeFi, Memecoins, and Trading.

Low Bounce Rate: High dwell time because the audience matches your offer.

Geographic Flexibility: Target Tier-1 (US/UK/EU) or high-volume emerging markets.

? Updated 2026 Competitive Pricing

We've optimized our rates to ensure you get the highest ROI in the industry. Whether you're testing a new lander or scaling a global launch, we have a seat at the table for you.

Package Visitors Price Rate (CPC) Best For

Micro-Pulse 100 \$25.00 \$0.25 A/B Testing & Instant Feedback

Starter Seed 5,000 \$100.00 \$0.02 Building Initial Heat

Growth Whale 25,000 \$450.00 \$0.018 Token Launches & Presales

Market Maker 100,000 \$1,500.00 \$0.015 Mass Awareness & Drainers

? Why the "Micro-Pulse" Tier is Your Secret Weapon:

Most vendors won't touch an order under \$100. By offering 100 visitors for \$25, you are lowering the barrier to entry for "small-fry" buyers who eventually turn into "whales."

Quality Proof: 100 real clicks are enough to see if a landing page actually converts.

Low Risk: Buyers are happy to "burn" \$25 to test a new vendor.

High Margin: While your bulk rates are lower, this tier earns you a significant premium per click.

Note on 2026 Market Context: With Bitcoin hovering in the \$120k–\$170k range and institutional adoption at an all-time high, "cheap" traffic is often ignored as bot-heavy. This \$0.25 price point for the entry tier screams "Quality over Quantity."

Traffic comes direct from cryptocurrency exchanges.
