Thread: [Bearhost.com VPS/RDP/CPANEL - Powerful Hosting from \\$4.49/mo | Linux/Windows](#)

Bearhost - January 31, 2026, 5:04 pm

Spoiler ([Click to View](#)) ? INTRODUCING [BEARHOST.COM](#) VPS/RDP HOSTING - Enterprise Power at Affordable Prices!

Are you looking for a scalable, powerful hosting solution with full control? BEARHOST VPS/RDP Hosting offers enterprise-grade performance starting at just \$4.49/month with flexible Linux & Windows options, cPanel support, and 30-day money-back guarantee.

??

WHAT IS BEARHOST VPS/RDP HOSTING?

VPS (Virtual Private Server) hosting provides dedicated server resources within a shared environment. This means you get the power of a dedicated server at a fraction of the cost. Perfect for developers, growing businesses, and applications that need more power than shared hosting can provide.

Key Difference from Shared Hosting:

- ? Dedicated Resources - CPU, RAM, and storage are YOURS ALONE (no noisy neighbors)
- ? Full Root/Admin Access - Complete control over your server
- ? Choice of Operating Systems - Deploy Linux or Windows based on your needs
- ? Scalable Performance - Grow your resources instantly without downtime
- ? cPanel & Managed Support Available - Hands-off management option

??

BEARHOST VPS PLANS & PRICING

? VPS CUB - \$4.49/month (or \$44.99/year with 15% discount)

- 1 vCPU Core
- 2GB RAM
- 20GB NVMe SSD Storage

Optional Extras Available:

- Additional Storage
- Additional RAM & vCPU
- Additional IP Addresses
- cPanel Management (Managed Option)

??

? POWERFUL FEATURES INCLUDED

Full Root Access

Customize every part of your VPS, install apps, run scripts, and configure the OS to your exact preferences. You have complete control.

NVMe SSD Storage

Lightning-fast performance across all plans. Pure SSD technology delivers blazing speeds for your applications, databases, and websites.

Choice of Operating Systems

Deploy your preferred OS instantly:

- ? Linux: Ubuntu, Debian, AlmaLinux, Rocky Linux, Fedora, Arch Linux
- ? Windows: Windows Server (Full control & compatibility)

KVM Virtualization

Enterprise-grade virtualization technology ensures stable, reliable performance and security isolation.

Scalable Resources

Your VPS grows with you - scale your CPU, RAM, and storage in just a few clicks without any downtime or server migration.

cPanel & Managed Support (Optional)

Prefer hands-off management? Choose our managed option with cPanel to handle updates, security patches, and ongoing support while you focus on your business.

Free SSL & Dedicated IP

Each VPS plan includes:

- ? Dedicated IPv4 Address
- ? Free SSL Certificate
- ? Security & Privacy

No Noisy Neighbors

Isolated resources mean consistent, predictable performance. Your CPU, RAM, and storage are 100% dedicated - unlike shared hosting.

??

WHY CHOOSE BEARHOST VPS?

? Developer-Friendly Ecosystem

Install Node.js, Docker, Python, custom apps, or any software project. Run your entire tech stack your way.

? Secure & Isolated Resources

No shared environment issues. Your resources are 100% isolated and dedicated to your projects only.

? Lightning-Fast Performance

NVMe SSD storage with premium network infrastructure delivers exceptional speed and reliability.

? Flexible Setup & Configuration

Select your Linux OS, manage DNS, configure firewall rules, and schedule cron jobs - full administrative control.

? 24/7 Expert Support

UK-based support team available around the clock via live chat, email, and phone. 2-minute average response time.

? Effortless Scalability

Add more vCPU cores, RAM, and storage instantly. Scale up during traffic spikes without server migration or downtime.

? Affordable Enterprise Power

Get dedicated server resources at a fraction of dedicated server costs. Starting at just \$4.49/month.

? 30-Day Money-Back Guarantee

Not satisfied? Full refund within 30 days - no questions asked. You risk nothing.

??

PERFECT FOR:

- ? Web Application Development & Hosting
- ? WordPress & CMS Hosting with Custom Plugins
- ? E-Commerce Stores & High-Traffic Websites
- ? Game Servers & Multiplayer Applications
- ? Docker & Container-Based Projects
- ? Machine Learning & Data Processing
- ? Custom APIs & Microservices
- ? Development & Testing Environments

- ? Growing Startups & Scale-ups
- ? Agencies Managing Multiple Client Sites
- ? Freelance Developers & Designers
- ? Database Servers & Big Data Projects

??

HOW VPS DIFFERS FROM OTHER OPTIONS

Shared Hosting vs VPS:

- Shared Hosting: Limited resources, shared CPU/RAM, basic features
- BearHost VPS: Dedicated resources, full root access, unlimited possibilities

VPS vs Dedicated Server:

- Dedicated Server: Much more expensive (\$89.99+/month)
- BearHost VPS: 50-80% cheaper, nearly identical performance for most projects

VPS vs Cloud Hosting:

- Cloud Hosting: Complex, requires technical knowledge to manage
- BearHost VPS: Simple, managed cPanel option available, 24/7 support

??

? GET STARTED

- ? Choose Your Plan (Cub, Bear, or Grizzly)
- ? Select Your Operating System (Linux or Windows)
- ? Deploy in Minutes
- ? Get Full Root Access Immediately
- ? 30-Day Money-Back Guarantee

Hello. We are a different company and hosting service to the one you are referencing.
You can check for yourself.
Thank you.

No. It is not.

Stanley - July 17, 2026, 8:07 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

NY DISCOUNT FOR HF USERES ???

13Vision37 - July 26, 2026, 5:33 pm

Great hosting price and service! Bought for 1 month but the domains are quite expensive starts 18\$\\ year.

Support team reply quickly..
