Thread: [Tabs or spaces? And why do people still argue about this?](#)

dhobs - *February 1, 2026, 2:23 am*

Tabs or spaces? And why do people still argue about this?

This debate has been around forever and somehow still starts arguments every time it comes up.

Do you use tabs or spaces, and is it just habit at this point or something you actually care about? Have you ever had a real argument with someone over it, or do you just adjust to whatever the project uses?

Let's hear the strong opinions.
